## Cinco Electronics Takes Recycling to a New Level

"As new electronics equipment and devices are introduced, outdated models are discarded. The volume of waste is staggering and decomposes quite slowly, placing a huge burden on landfills and our environment. CER is thrilled to open a new location in Grove City to proactively collect and recycle this equipment, reclaiming precious resources for re-use while keeping toxic materials out of landfills," said Rob King, President of Cinco Electronics Recycling.

Cinco Electronics Recycling (CER) has been providing environmentally responsible end-of-life electronic equipment reclamation services to consumers, small to medium size businesses (SMBs), the Fortune 500, government agencies and educational institutions since 2000. In addition to close monitoring and compliance with all EPA standards and related laws, CER maintains certification in **Responsible Recycling (R2)**, ISO 14001, ISO 9001, and OHSAS 18001:2007. E-waste processed through CER's state-of-the-art facilities is reduced to raw commodities and reintroduced to the supply chain. A strong asset tracking system, video verification of data security and Certificates of Destruction assure CER clients their equipment has been recycled in compliance with environmental regulations. The firm operates facilities in Ontario, CA; Austin, TX; and Grove City, OH.
